

AVArray: Index 0 not in range 0..-1 problem

Posted by astewart - 2008/04/21 23:14

I'm having some problems with the pond scripts (both releasing and nonreleasing) ... they seem to fail just before writing the discretized shapefiles with the following error:

AVArray: Index 0 not in range 0..-1

I've tried different CSAs, but this doesn't seem to affect the outcome. I should mention I need a fairly small CSA to capture the pond/reach of interest.

Any suggestions?

Thanks!
